SUPPORT / QUESTIONS:

For questions and support please contact us by email: support@certgate.com

GETTING A TRIAL ACCOUNT

If you need an activation code for trial version of cgPhone, please contact support@certgate.com. Once you received the code, you may use cgPhone for 14 days without any limitations.

INSTALLATION & CONFIGURATION

Download and installation

Simply find the app cgPhone, by searching for cgPhone, in the official Apple App Store and install it.

1

Initial setup

Open the cgPhone app on your iOS device:

1. The app will welcome you with a short overview of its functions.
2. After tapping „Continue“ the initial configuration of your device will begin.

Now you need your cgPhone server address and an individual activation code to access your cgPhone server¹.

1. Please enter the cgPhone server address and activation code and tap „Connect“.
2. The automatic configuration process takes only a few

This is an example. Please fill in your individual server address and code

moments. When it has completed successfully you will see the following dialog. Please tap „Continue“.

If you receive an error message, please make sure to double check if your information is correct. If your data is correct and the error persists, please contact our cgPhone support.

2

Done

Configuration is now complete! You are now able to start or receive your first secure call. You may also dial 9999 for an echo test call.

cgPhone

QUICK START GUIDE

FOR iOS

CGPHONE INTERFACE AND ITS FUNCTIONS

The default screen of cgPhone is the keypad. With the toolbar on the bottom of your cgPhone app you access all functionalities of cgPhone.

Your account name, Your cgPhone number

A

CONTACTS

Here you can manage all your cgPhone contacts.

B

MESSAGES

Open messages for an overview of your chats.

C

KEYPAD

Use the keypad to dial any number of your choice. Remember that you can only dial numbers of participants within your network. Connection to other (public) networks must be ordered separately (if available).

D

CALL HISTORY

Here you will find the call history. There are three types of calls:

- Incoming call
- Missed call
- Outgoing call

E

SETTINGS

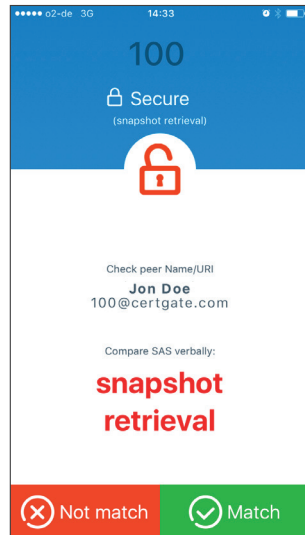

Here you will find various options. It's also used for new provisionings if required.

¹) If your company/organization has purchased cgPhone, please ask your system administrator for your activation code. If you have individually purchased cgPhone service, you should have received your activation code with your invoice.

THE FIRST SECURE CALL ON YOUR CGPHONE

*SAS = Short Authentication Strings

cgPhone prevents you securely from man-in-the-middle attacks by one-time exchange of phonetic keywords. This is a global standard for secure calling.

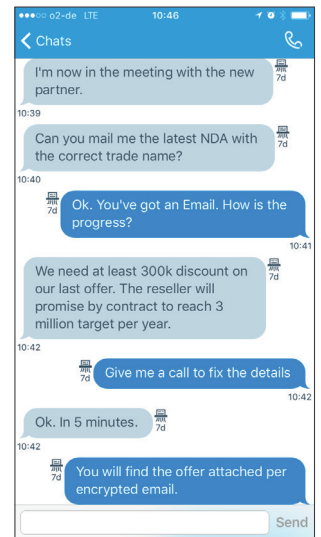

Secure Key exchange with SAS*

To assure secure communication, a key exchange is required at the first cgPhone call with each participant. **Please note that this is only required once.**

1. One participant reads the first word shown on the display. In this example „snapshot“.
2. The other participant replies with the second word. In this example „retrieval“.
3. Both participants compare, if these two words match with the displayed words.
4. If the words are identical both participants have to choose „match“. This call and future calls with this contact are securely end-to-end encrypted now.

! Please note: If the words do not match, choose „Not match“. The call will be disconnected. Maybe there is a security issue with this contact or with the connection.

OTHER FUNCTIONS

Mailbox

You can access your mailbox by dialing 9000, if activated by our cgPhone support.

1. You will be requested to enter your cgPhone number
2. You will be requested to enter your Mailbox PIN that you received by a separated email
3. Use the keypad to navigate through the mailbox menu

Adding a contact

Once you have finished a call, you can add this cgPhone number to your contacts.

1. To add a new contact, go to your recent calls. Press and hold the number of choice for 1 second.
2. An info box will appear
3. Choose „Create a Contact“ or „Add to existing Contact“

Sending a message (the first time)

Once you have done a successfully secure call, you can send a secure message to this cgPhone contact.

To write a new message, go to your recent calls and press the number of choice for 1 second.

1. An info box will appear
2. Choose „Send Message“
3. The message interface will appear

Sending a message

1. You can also write secure messages by using the toolbar
2. Choose a contact
3. The chat Interface will appear
