2-FACTOR SECURITY THAT SUITS
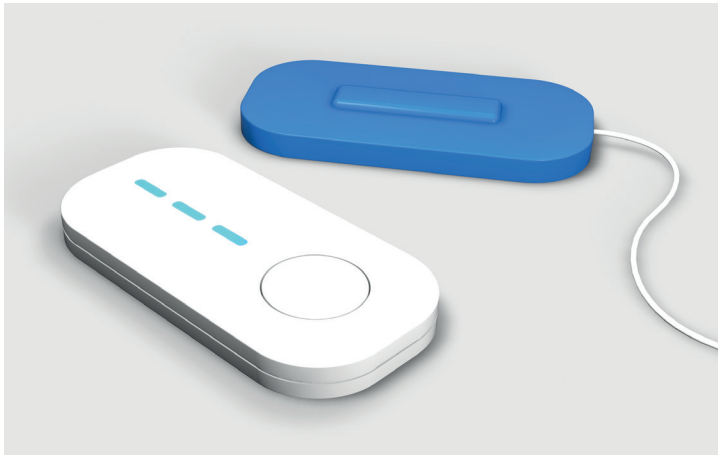

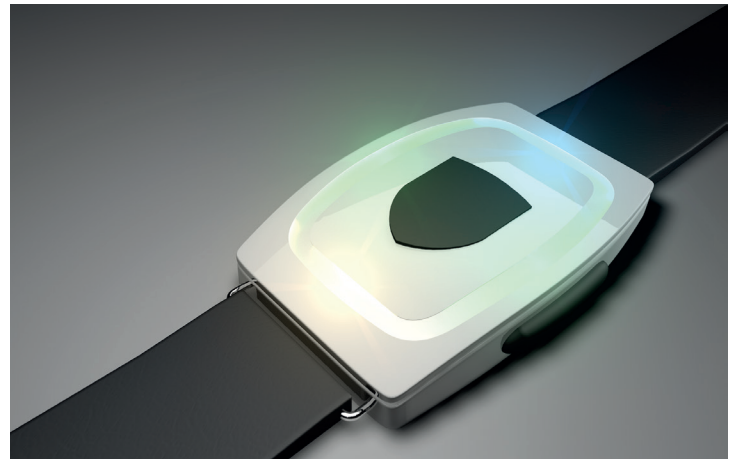

CUSTOM
ONEKEY

Strong 2-factor security
for your individual needs.

YOU CHOOSE
THE FORM FACTOR

Whether bracelet, USB stick or in the form of your choice. It can be used as a device for accepting existing smart cards or a fixed built-in „secure element".

INTERNATIONAL
STANDARDS

Your CUSTOM ONEKEY will be based on national or international standards, enabling compatibility worldwide with most common IT systems. The crypto chip has been certified according to the globally recognized Common Criteria Standard (EAL5+). Compliance with international environmental standards will be guaranteed.

RoHS   FC   C E

OPTIMIZED FOR
YOUR IT ENVIRONMENT

No matter which devices you will use. Your individual CUSTOM ONEKEY will provide your digital certificates and keys to all your authorized devices. Especially in mobile environments, the CUSTOM ONEKEY, is showing its strengths and connects to your smartphone, tablet, laptop or desktop via BLE and NFC. Extend your use cases to payment and physical access, to focus on one digital key.

- ✓ Certified EAL5+ security for your company
- ✓ Exactly in your corporate design
- ✓ Optimized for your requirements
- ✓ Secure your Smartphone, Tablet & PC via Bluetooth
- ✓ Also available with NFC (Payment, Physical Access, etc.)

FITS 100% TO
YOUR REQUIREMENTS

Jointly with you, we will determine your exact requirements in a dedicated workshop and document all of them. Afterwards, we will create custom-fit designs drafts for components, performance and design studies as 3D rendering models for your individual ONEKEY. Upon request, we may carry out an additional certification for you. Depending on your requirements and design, we will work out with you to calculate needed delivery time and production volume.
